Re: Fume hood exhaust systems for Welch Hall Chemistry Building, the University of Texas at Austin.

Dear Mr. Reitmeyer,

This letter is to express my appreciation for the successful installation of the new fume exhaust systems at the subject project. As you well know, the installation was accomplished under the difficult conditions of having the building kept in use for the staff and students during construction. I commend you for the excellent cooperation and skill shown in construction of the complex, thirteen systems passing through the six floors and roof of the existing concrete and steel structure.

Your attention to detail and compliance with the plans and specifications resulted in the high performance expected of the design by the owners, thus a job well done. I look forward to future work with your company in implementation of our clients' construction needs.

Sincerely,

E.G. Bloomquist
